

SHUBHAM KUMAR TRIPATHI

Software Development Engineer

Noida, UP, India

2+ years of experience as a Software Developer with proven experience in designing, developing, and deploying scalable, cloud-based enterprise applications using Java, Spring Boot, and AWS. Proficient in microservices, RESTful APIs, and database optimization with MongoDB, Redis, and Kafka. Strong understanding of the Software Development Lifecycle (SDLC), distributed systems, and performance-driven architecture — focused on delivering reliable, maintainable solutions.

TECHNICAL SKILLS

- **Languages & Frameworks:** Java, Spring Boot, Spring MVC, Spring Security, Microservices Architecture
- **Backend & APIs:** REST APIs, OpenAPI, Swagger, JSON, XML, JWT, API Gateway, Rate Limiting, API Versioning
- **Databases & Caching:** MongoDB, Redis, Query Optimization, Database Design, Indexing Strategies
- **Testing & Quality:** JUnit, JMeter, Test-Driven Development (TDD), Unit, Integration & Load Testing
- **Cloud & DevOps:** AWS (EC2, S3, SQS), Docker, Kafka, CI/CD, Git, Maven, Jenkins, Infrastructure Management
- **Other Tools & Practices:** Agile/Scrum, Code Reviews, System Design, Performance Optimization, Production Support, JIRA, Asana, IntelliJ IDEA, Postman, Mongo Atlas

WORK EXPERIENCE

Software Developer

Noida, UP

Saltoris

November 2023 - Present

- **ROLE:** Software Developer contributing to the design, development, and deployment of scalable enterprise systems using **Java, Spring Boot, MongoDB, and microservices architecture** in a fast-paced startup environment.

KEY ACHIEVEMENTS:

- Working on **Nagpur Jal Grahak Seva App** — the OCW Utility Application - managing end-to-end water operations for citizens and staff, including **billing, payments, complaints, and service requests, and new connections**.
- Collaborated within a small agile team to design and develop **REST APIs** for core modules, including **meter reading, billing (450K+ monthly bills), ledgers, authentication, and payments (PhonePe, Cashdesk)** — supporting **25K+ daily transactions** for **450K+ consumers** with **99.5%+ success rate**. Integrated **iKonTel (SMS & Email)** to send **10K+ daily notifications** at **99% reliability**.
- Contributed to the **zero-downtime migration of 4.5+ lakh consumer records** from a legacy SAP system to a **MongoDB-based microservices platform**, building transformation pipelines and validation frameworks to ensure **100% data integrity**.
- Enhanced performance and reliability by implementing **Redis caching**, optimizing **MongoDB queries**, and integrating **AWS SQS** in **meter reading and payment modules**. Developed dynamic **PDF generation workflows** using **Apache PDFBox** and optimized image uploads with **pre-signed S3 URLs**, achieving **75% lower API latency** and **40% higher system resilience**.
- Participated in design reviews and **Agile sprints**, ensuring stable releases and faster delivery through cross-functional collaboration.

TECHNICAL EXPERTISE USED IN DAY-TO-DAY WORK:

- **API Development:** Designed and documented **200+ REST APIs** using **Java, Spring Boot, MongoDB, and Swagger**; tested via **Postman** and **JUnit**.
- **System Design & Architecture:** Contributed to scalable **microservices** for **billing, authentication, and ledger** systems, integrating with **payment gateways** and **notification services**.
- **Testing & QA:** Implemented test strategies using **JUnit** and **JMeter**, achieving **85%+ coverage** and resolving **300+ issues pre-deployment**.
- **Production Support:** Managed **AWS EC2** deployments via **CI/CD pipelines**, monitored production logs, and ensured **99.9% uptime** with rapid issue resolution (average MTTR under 2 hours).

Software Developer Intern

Dharamshala, HP

Godspeed

July 2023 - October 2023

- Collaborated with senior engineers to build and test backend **REST APIs** using **Java, Spring Boot, and MongoDB**.
- Contributed to debugging, integration, and database operations while following **Agile workflows** and version control using **Git**.

Web Development Intern

Remote

Streamkast

May 2021 - July 2021

- Conducted manual cross-browser testing and documented bugs, improving release cycles by **20%**.
- Resolved **50+ functional and performance issues**, improving web stability by **40%**.

EDUCATION

Lakshmi Narain College Of Technology, Bhopal, Madhya Pradesh

August 2019 - June 2023

Bachelor of Technology in Electrical Engineering

CGPA: 8.43
